Board of Secondary Education

SR prime school
2020 – 2021

TECHNICAL SKILLS

- Python
- SQL
- Data Structures
- C
- HTML & CSS

CERTIFICATIONS

- Basics of python- Infosys
- Explore Machine Learning using Python- Infosys
- Artificial Intelligence Fundamentals- IBM

PROFESSIONAL EXPERIENCE

ONLINE MEDICINE ORDERING SYSTEM

Developed a web-based online medicine ordering system that enables users to browse, search, and purchase medicines conveniently from their homes. The platform is designed to simplify the medicine procurement process while ensuring efficiency and reliability.

Technologies Used: Python, SQL, HTML, CSS.

Outcome: Improved accessibility to medicines and streamlined the ordering process for both customers and pharmacy administrators.

FREELANCER CLIENT MATCHING PLATFORM

Built a digital platform that connects skilled freelancers with clients based on project requirements and expertise. The system focuses on creating efficient collaborations and ensuring seamless communication between both parties.

Technologies Used: Python / C, SQL, HTML & CSS.

Outcome: Created a structured ecosystem that simplifies talent discovery and enhances professional collaboration.

INTERESTS

- Learning Emerging Technologies (AI, ML, Data Science)
- Problem Solving & Competitive Programming
- Building Real-World Tech Projects.
- Chess and Strategic games
